

## AMENDMENT AND RESPONSE UNDER 37 CFR § 1.111

Serial Number: 09/457,841

Filing Date: December 9, 1999

Title: COMPUTER CONFIGURATION RESTORE METHOD AND APPARATUS

Page 2

Atty Dkt: P1570US00

24. (New) The method of claim 23, further comprising:  
storing the known-good computer configuration on a hard drive.
25. (New) The method of claim 2, wherein the non-interactive user input consists of actuating a single switch or key, or a simultaneous key combination of the computer.
26. (New) The method of claim 2, wherein the non-interactive user input does not require user entry of information or interfacing with a graphical representation to function.
27. (New) The machine-readable medium of claim 16, further comprising:  
receive an indication that the non-interactive user input has been actuated;  
wherein the restoring the known-good configuration is based on said indication.
28. (New) The machine-readable medium of claim 27, wherein the known-good configuration is restored without rebooting the computer.
29. (New) The machine-readable medium of claim 16, further comprising:  
prompt a user to store the known-good computer configuration.
30. (New) The machine-readable medium of claim 29, further comprising:  
make a determination that a current configuration is the known-good computer configuration; and  
notify a user of a basis for making the determination.
31. (New) The machine-readable medium of claim 30, further comprising:  
store the known-good computer configuration on a hard drive.
32. (New) The machine-readable medium of claim 17, wherein the non-interactive user input
